- (71)出願人(米国を除く全ての指定国について): アイビーフレックス株式会社(IP FLEX INC.) [JP/JP]; 〒150-0021 東京都渋谷区恵比寿西一丁目16番6号 Tokyo (JP).
- (71)出願人および
(72)発明者: 佐藤友美(SATO, Tomoyoshi) [JP/JP]; 〒305-0046 茨城県つくば市東2丁目18番地10ルームーつくば31号202 Ibaraki (JP).

(54) Title: DATA PROCESSOR

(54)発明の名称: データ処理装置

(57) Abstract: A control program includes an instruction set having a first field where an execution instruction to specify the contents of an operation or another data processing executed by at least one processing unit constituting a data processor can be written and a second field where preparation information, the contents of which is independent of the contents of the execution instruction written in the first field, for setting the processing unit so that an operation or another data processing executed by an execution instruction can be executed can be written. It is possible to prepare execution of succeeding execution instructions thanks to the preparation information. Therefore the problems that cannot be solved by a conventional instruction set, for example, in the case of a branch instruction, the branch destination is written in the second field, and therefore the branch destination can be known previously.
